Chuck FRECHETTE

"Dr Samaha, absolutely amazing results! The brilliant smile that you created literally transformed my life in just a few appointments! I can only say thanks so much for the new confidence that you have bestowed.

At 55, my new smile also reflects important transitions in my personal and professional worlds. Now when I engage others, I notice that they seem to take a second look which only encourages me to respond with an even bigger, more hearty smile! And as an added benefit, people also appear more interested in what I have to say.

Your treatment plan and program have accomplished the 'max effect.' Despite extensive experience straightening my teeth with braces and later with whitening, neither lasted. And while I had seen another dentist regularly for many years, I was shocked to learn about the serious cracks and even decay that you discovered and showed me with your state-of-the-art technology. Appreciated too, was the crystal clear vision, showing how my teeth and appearance could be so dramatically improved.

While I have always taken good care of myself and maintained excellent health, my unhealthy looking smile misrepresented my true fitness to the world around me.

I also have come to realize that people are naturally attracted to healthy looking people - especially healthy looking smiles. Now that I have a great smile, I can't imagine living without one. I really value what you have done for me, Dr. Samaha. As a practical and honest person, I would like to tell everyone who has been in my shoes that your treatment was well worth the money. By following your recommendations their worlds will be expanded in virtually every way.

I feel 100% for the first time! Not only do I have a great looking smile, I have stronger, healthier teeth that will need minimal care for the rest of my life. Having you reconstruct my teeth was an investment that makes dollars and 'sense' in every respect."
